IN THE ABSTRACT

Page 20, line 8, replace "receive a support" with -- receive support --.

ABSTRACT

A bulk bag comprises a side wall formed from woven polypropylene fabric and comprising a cylindrical configuration. Long, narrow, strips of polypropylene fabric is sewn to the side wall panels at spaced apart locations to define pockets which receive [[a]] support members. Alternatively, the pockets may be formed by gathering the fabric of the side wall to define the pocket and securing the gathered material in place by sewing.
